## LAWRENCE OF

### ARABIA DIES

Following a motor cycle accident, "Lawrence of Arabia" one of the most romantic personages of modern times, died at eight a.m. on Sunday last. He had been unconscious for 142 hours.

Pate's inevitable hour removed the most romantic figure of our age in Lawrence of Arabia. In life a person of almost incredible heroism and glory in death we prophesy, he will become one of the giants in history. This small shy, spare, archaeologist found his great hour not in discovering buried relics of bygone ages, but in presenting to the Arab tribes the living possibility of a great Arabian federation. He wedded a mass of hostile nomads into a co-ordinated power; he made armies grow out of discordant and envious desert peoples. Obnoxious alike of tradition and convention he proved himself a master strategist, a tactician of superb skill. As a diplomat he combined in his person such patience, wisdom and foresight that a man might spend a lifetime in failing to acquire.

Where else in history can be found a story to parallel his? He a foreigner, a Christian unbeliever in his Mohammedan followers, led them, organized them, pacified their local feuds, brought them nearer to Arabian independence than any of their own leaders for centuries. Moreover he kept them in the field for years harassing the Turkish armies and hindering their communications. Without him and his Arabs it is doubtful whether Allenby's success in Palestine and Syria could have been so complete; whether the knock-out blow then delivered might have been longer and more costly in blood and treasure and time.

His major aim of an Arabian Empire he failed to attain not because of any weakness on his part or of any personal blunder. Not because of the politician's greed on him, at Versailles. Clemenceau jealous for French prestige could not or would not remove from Syria the tutelage of his nation. Rival clashes over Mesopotamia in Palestine and even among the Arab chieftains also helped to foil him.

Hours of course were heaped upon him and as many were refused. But the man who despised nobility, whether of civilian or of military type, whom rigid discipline bored to tears, who was a law unto himself even as a soldier, regarded them of little worth. When the powers in their night assembled to proclaim and dispense treasures and Lawrence found that his assurances to his erstwhile followers were to be swamped under the necessities and urgencies of international intrigue he handed back respectfully but firmly, all honors conferred upon him. He felt he had been betrayed as his followers have been betrayed.

Lawrence's aim is his legacy to the Arabs. Some day some strong man will arise among them to perfect it. Irak and Syria and the Nejd and Yemen may be consolidated into the great Arabian Empire. Meanwhile his name and his fame are secure from the Red Sea and the Mediterranean to the Persian Gulf. Almost legendary in Arab history through the later years of his life time will enshrine and immortalize him in the years to come. In the desert spaces for long they will tell in their tents of his wonderful feats of endurance, his mastery of their language, their traits and their characteristics; his leadership and idealism. He has set the Arab steps towards unity and independence; towards to continue.

### SCHOOL SPORTS DAY

It is estimated that approximately 1500 persons attended the Inter-school Sports of the First Annual Field Day of the Red Deer Inspectorate, held at the Exhibition Grounds, Lacombe, on Saturday, May 18th. Despite the heavy rain-fall of the previous day, when it was felt many roads would be impassable, 94 teams appeared for competition. Results were as follows:

Football: Boys' Class A, Delburne defeated Red Deer. Class B, Eckville and Sylvan Lake to meet June 1st at Red Deer. Class C, Lacombe defeated Bentley. Rival, Mixed, Sunset Hill defeated Edmonton. Football, Class A, Delburne and Edmonton met June 1st at Red Deer. Class B, Great Bend defeated Red Deer.

## Deer.

Basketball, Boys' Class A: Section 1, Brankine; Section 2, Great Bend. Girls' Class A, Section 1, Great Bend; Section 2, Great Bend; Class B, Red Deer. Rural, Gaets Valley.

Open Baseball, Lacombe and Delburne to meet June 1st at Red Deer. Junior, Great Bend defeated Red Deer.

Softball, Girls' Class A, Rocky Mountain House defeated Red Deer. Class B, Delburne defeated Bentley. Class C, Delburne defeated Lacombe. Rural combined, Class B, Spring Valley and Lakeside defeated Crossroads and Poplar Ridge.

Officers in charge were: Honorary President, Inspector W. J. McLean; President, E. Kelly, Delburne, Alta.; Vice-President, N. Pickard, Lacombe; Secretary A. Penman, Lacombe.

### CASH WANTED

Having reached the place where it can no longer ignore advice in money matters, or even get along without it, there is no denying that the Provincial Government is seeking advice from a sufficiently wide area, geographic and economic.

With Major Douglas on the ground to explain the solvent powers of Social Credit, one member of the cabinet and also the mentor of the Government have been commissioned to proceed to Ottawa, where they will sit at the feet of Premier Bennett and learn from him of the restorative properties of "sound money."

Seeking guidance thus at both points of economic thought, it is to be supposed the Ministers will also canvass the ground between, and take into consideration the very numerous and equally varied plans advanced by men of more moderate views, or at least do so if time permitted.

Unfortunately having delayed the quest for light until the elections can be no much longer denied the right to elect a new legislature the Government is now in a position where it must get advice on the quick-or-perish principle, and take some other, whatever it may be and from whatever quarter it may come. The election cannot be held off indefinitely, and to go to the country without a glimmer of a financial policy which it may possibly follow if returned, would be about the surest of all ways of making certain that it would not get re-elected.

In which circumstances, the betting is all one way as to who will prescribe the advice and what it will be. Premier Bennett has the floor, as against Major Douglas and all comers. For the reason that the Government must have money if it is to carry on road construction and other activities appropriate to an election season, and there is only one place it can get the money, or the necessary backing—the Dominion treasury, over which Mr. Bennett presides with a stern and watchful eye, open to political considerations and reactions as to other things.

The prospect thus is that while Major Douglas formulates plans and Mr. Bennett's broadcast scorn at Mr. Brownlee's broadcasts, Mr. Bennett will decide on what financial policy, and with what concurrent public and works activities the Government will go to country. For while advice is supposed to be what the Ministers are seeking, cash happens to be the thing they have to get, in large quantities, and before the time when they will have to go on the stump and tell the voters what they are doing and propose to do in their behalf.

### WORK FOR 1000 MARRIED MEN

Reopening of work on the Jasper-Lake Louise highway will give employment to 1000 married men now carried on relief rolls in Edmonton, Calgary and Lethbridge. About 400 will be taken from Edmonton, according to an announcement yesterday.

Such information constitutes good news. Not only will 1000 families benefit by the receipt of larger incomes during the summer months, than if they were maintained by the cities, but the cities themselves will be relieved of a considerable expenditure during the time the men are employed. Of even greater importance is the effect on the men themselves. Back at a job that will last them three or four months, many hundreds of them will "find themselves" again after months or years of comparative idleness.

Expenditure on public works yield such good results in times of depression that both federal and provincial governments should not hesitate to "over-expend" for this purpose. When industry is active and employment at a low ebb, is the time to cut expenditure on public works to a minimum.

T. M. JOHNSTON

Decorator

## THE CELEBRATION

The children of town and district will have the time of their lives on Friday, May 24th. A free ice cream will be given to all children, and there will be races of all kinds. The Executive have drawn up a good program of races and various sports, including Football and Softball. Should the day be wet so that the children's sports cannot be held, there will be a free picture show in the afternoon to which all children of town and country are invited, free of charge.

Children's sports will be held on the Football field, starting at 2:30. Football game starts at 4:30 and Softball at 6:30. The huge Bonfire will be started at 9:30 and a Royal Salute of 21 rockets will be fired off. At 10:15 the Siren will blow and the Lacombe Fire Brigade will turn out and put out the fire.

A free dance will be held in Bob Park's new garage in the evening to which everyone is invited. Card parties will be held at both the Adelphi and Empress Hotels free.

### FIRE DOES \$35,000

#### DAMAGE AT RIMBEY

About 2:30 a.m. on Tuesday, fire broke out in the rear of the building occupied by Jones & Co., general merchants at Rimbey. From this frame building the fire quickly spread to adjoining buildings, and in less than two hours five buildings on Rimbey's main street were completely reduced to ashes.

Heroic work on the part of the volunteer bucket brigade undoubtedly saved the entire street from being wiped out. The weather also favored the fire fighters, there being hardly any wind at all. Had a wind been blowing, nothing could have stopped the blaze.

The heaviest losses by the fire were Jones and Co., general store, building owned by the Bank of Montreal; Zelnak Hardware Co.; Lewis Barber Shop and dwelling; Mrs. Helen Wood, dwelling; Dr. H. E. Halpin, dental office; building owned by A. B. MacDonald; C. C. Lefsky, office of Massey-Harris; etc.

It is conservatively estimated that the loss will exceed \$35,000.

### \$480 A YEAR

Some gentlemen whose names have been written in the scroll of fame through the investigations of the Stevens committee must surely be interested in this bit of information disclosed by relatives since the death of Lawrence of Arabia. His chief possession was his cottage. Lawrence's income was only \$480 a year. He refused to take any more.

The man who knocked one of the enemy countries out of the great war, and smashed the plans of the Turks to align the Moslems against western civilization, was content to live on \$480 a year when he could have had wealth for accepting it from a grateful country.

Some of Canada's tariff-made monopolies upon whom the committee has been so busy have been collecting that much per day, by squeezing the producers of materials, robbing their employees, and gouging their customers. They have dodged income taxes to amounts on which \$480 would not begin to pay interest.

Of course they will not understand Lawrence. By their standard of judgment he was a fool. If one of these gentlemen had chased the Turks out of Arabia he would have found out by grabbing the country. And at that he would have been using the Arabians a great deal better than he and his kind have been treating the people of Canada, upon whom they have conferred no favor whatever except freeing them from any temptation to over-act.

If Canadians have anything of the spunk of Lawrence they will proceed to treat these industrial Turks as he treated the originals.

### 60 PER CENT OF

#### WHEAT SOWN TO DATE

Sixty per cent. of the wheat crop has been sown in central and northern Alberta, according to telegraphic reports from many key points.

The figure is an average because, while some farmers have sown all their wheat, others have been able to start seeding only this week where lands were wet. Wheat will be sown for a week yet. As a result of the late start, two to three weeks behind the average, attention has been focused on wheat and little coarse grains have yet been sown.

### NEGLIGENCE?

In Winnipeg the other day a six-pound package of deadly poison was left in a parked car and disappeared. Now police are looking for the stuff, for the children may find it, think it was candy, and suffer a swift and agonizing death. And what are the police doing about the person who left the poison unguarded? Was not such an act criminally negligent?

## OPENS CAMPAIGN

With a meeting called for Monday next in Bentley Community Hall, Fred Sissons opens his election campaign. On this occasion W. R. Howson, M.L.A., Provincial Liberal leader, will be present and address the meeting. Mr. Sissons, who is a pleasing speaker will give his views on the outstanding questions before the electorate, and explain the Liberal Platform. It is expected that there will be a very large turnout of election from all parts of the district. Mr. Sissons reports that he is getting pledges of support from all sections of the constituency.

### WEDNESDAY HALF HOLIDAY

At a meeting of the council on Tuesday evening, a bylaw was passed ordering the closing of all business places in Lacombe on Wednesday afternoons during the months of June, July and August, at 12 o'clock noon. A penalty of \$25 is provided for infractions of this bylaw. Restaurants, service stations, garages, and other places operating under Provincial license are exempted. The holidays begin on Wednesday, June 5.

### AT THE AVLON

May 23, 24 and 25  
"Kentucky Kernels," starring Whitely and Woolley. A fast moving comedy which will be enjoyed by old and young.

May 30, 31, June 1: "Thin Man," starring Myrna Loy.

June 6, 7 and 8, "Gay Divorcee," starring Ginger Rogers and Fred Astaire.

### RÉCITAL JUNE 7th

The piano pupils of Mrs. Reed, will give their annual Recital Friday evening, June 7th. Miss Brenda Reed, dramatic soprano will be the assisting artist.

A silver collection at the door will go to the funds of the Junior choir.

### SOCIAL CREDIT

The Women's Study Group, had their monthly meeting at Mrs. D. Smith's home, and a very pleasant program ensued. Articles of interest were read by each of the following ladies: Mrs. D. Thompson, Mrs. T. Barker, Mrs. McNeill, Mrs. Shearer and Mrs. R. Watson. The next meeting will be held at Mrs. E. Watson's home on Thursday afternoon, June 20th.

### ROBT. WATT INJURED

While helping to move a barn with a tractor on Monday afternoon last, Robert Watt, son of Mr. and Mrs. Herb Watt, sustained a broken leg and is at present in hospital. It appears that Robert was hooking a chain on to the building, and when the tractor backed up, he was caught between the machine and the building.

### Keep GOING with

#### PEP

#### FLAKES

You can tell Kellogg's PEP Bran Flakes by flavor and crispness. And you can be assured they are genuine bran flakes. Full of flavor and nourishment. Children love them. These truly better bran flakes have enough extra bran to be mildly laxative. Always fresh and ready to eat with milk or cream. Sold by all grocers. Made by Kellogg in London, Ont.

## SOCIAL CREDIT NOMINATIONS

R. E. Ansley, Blackfalds; Bruce McMillan, Tees; J. H. Unwin, Calgary and Norman Jacques, Mirror, were elected from a slate of nine nominees, a Social Credit Convention held here on May 21st. These four nominees will appear before the Advisory Committee on May 24th at Sylvan Lake, when Mr. Aberhart and the delegates will decide which one is to be the candidate at the forthcoming election. Losing nominees were, W. J. Trout, T. F. Roberts, W. Chessor, J. Fretwell and A. C. Johnson. Five elimination ballots were necessary.

As some of these prospective candidates had formerly been delegates the Convention was obliged to elect other delegates to fill the vacancies created by their nomination. These were, J. F. Miller, Bentley; I. V. Carter, Tees and T. F. Roberts, Lacombe. Remaining delegates include, W. Chessor, C. Baum, J. A. Speers and Mrs. Oakley. 24 delegates were present and W. J. Trout was elected Chairman for the meeting. A resolution passed that any candidate receiving the election, must reside in the constituency unless he becomes a Cabinet Minister. Constituency officers were elected as follows: President, T. F. Roberts; Vice-President, Wm. Chessor, Secretary, J. Russell. Announcement was made that Mr. Aberhart would address a meeting at Sylvan Lake at 3:30 on May 24th.

### Canadian Legion Smoker

Arrangements are being made for a Smoker to be held on the evening of June 3rd. Watch the Globe for further announcements.

### BRIDE-TO-BE ENTERTAINS

Miss Clara Douglas, only daughter of Mr. and Mrs. Marshall Douglas, of Lacombe, entertained her numerous friends at a "Bridal Tea" at the home of her parents, on Friday, May 17th. The profusion of beautiful hemstitched linen, silver and other gifts attested to the popularity of the bride-to-be and the esteem in which the family is held in the community. The marriage of Miss Douglas and Mr. Alexander Watson, of Toronto is announced to take place on May 23rd. Mr. Douglas has been for years a prominent farmer and stockman of Lacombe.

### TIERED MOTHER'S CAMP

Mother's Housekeepers! Would you like a holiday at the lake this summer? The Women's Institute is sponsoring a five day camp at McLaurin's Beach, from July 20th to August 3rd, which is open to any mother or housekeeper who will make application to the committee. The fee is \$1.00 and those attending must provide their own bedding and food. Please get your application in early.

For any further information please write or see any one of the following committee on arrangements: Mrs. A. Jenkins, Mrs. R. Saunders, Mrs. J. Graydon, Mrs. J. Sherrer and Mrs. W. Clarke.

## SAM MURRAY FAREWELL

On the eve of his departure for a well earned holiday, Mr. S. M. Murray for the past thirteen years one of our enterprising businessmen, was the guest of honor at a gathering of his friends on Monday evening last. During the evening he was presented with a club bag as a small token of the esteem in which he was held in Lacombe. Since his coming to Lacombe "Sam" has taken a deep interest in every movement for the betterment of the town, and has also some great deal to put Lacombe to the front in the line of sports of all kinds. The best wishes of his many friends here follow him to his new field of endeavor.

The regular monthly meeting of the Women's Conservative Club, Lacombe will be held at the home of Mrs. H. E. Carruthers, Tuesday evening, May 28th, at 8 p.m. All ladies interested in our work are urged to be present.

### LOCOMBE Y.P.S. DERBYERS MEET NORTH HILL, CALGARY

On Friday, May 31st, in St. Andrew's United Church, the debating team of the Young People's Society will meet a team from North Hill, Calgary. United Church, in the Provincial semi-finals. The local team consisting of Roger Thompson and Don McFadden, will uphold the negative of the resolution: "That Sweepstakes should be abolished in Canada."

In the Lacombe team we have two able and experienced debaters, who present their arguments in a very instructive, convincing and entertaining form, and who have well earned the victories which have brought them to the semi-finals. Don't miss this debate on a subject of present-day general interest. A silver collection will be taken at the door.

### THE BULL SALE

The Twenty-Sixth Annual Bull Sale will be held at Lacombe Exhibition Grounds on Thursday, June 6th. Catalogues are now out and 77 purebred bulls have been listed. These comprise Hereford, Shorthorn and Aberdeen-Angus. Judging will commence at 10 a.m. and the Auction Sale will start at 1 p.m. C. F. Dameron is the Auctioneer. For any information regarding the sale, get in touch with the Secretary, D. F. Chisholm.

### BAPTIST CHURCH

"Do you know Jesus?" Sunday at 7:30. Sunday School at 11. Juniors at 6:15. Young People's hike Monday at 8 p.m. Don't forget the Central Alberta Baptist Picnic at Gull Lake, Friday. Bring your dinner and supper and have a good time.

## Your Boys

I have four sons, two of them approaching the age when they must go out and face the earning of a living, writing a man to a newspaper. Is he disturbed and troubled over the prospect of the difficulties which for the time being may confront these young men in obtaining employment and making a start in life? No, he is wise enough and has had experience enough to realize that countless thousands of other young men starting to carve out careers for themselves had to face difficulties and had many obstacles to overcome. No doubt he passed through such experiences himself. It has been the way of the world since time immemorial.

Nevertheless this father of four boys is worried. He has reason to be, and so, too, have other parents all over the land. This man writes that all this recent propaganda, these ever repeated demands, that the Government should guarantee "the security of the home, the security of livelihood and the security of social insurance" causes him to wonder if the prospect of so much sheltering, so much safeguarding, so much financial protection, so much paternalism will cause his boys to discount, disregard, despise his teachings.

I have, he says, tried to impress upon them that they must fit themselves to make their own way in the world, that they must develop self-reliance, that they must cultivate a spirit of many independence, that they must be prepared to earn every penny coming to them, that they must expect nothing for nothing in this world.

To achieve this, I have emphasized that they must be studious and industrious, that they must exercise rational frugality and self-denial until they have accumulated a competency, that they must aspire not only to take care of themselves and their dependents, but to acquire means to aid generously those who are in need.

I have warned them against extravagance, petulance, thriftlessness, thoughtlessness, in order that they may escape the hardships and humiliations which befall so many in old age, explaining that it is infinitely better to be able to bestow charity than to be compelled to accept it.

"Don't let any professor convince you," I tell them, "that 'the world owes you a living.' Get it firmly into your head that it is up to you to fit yourself to earn a living and that you will encounter plenty of competition. Don't hesitate to sacrifice in the fore part of your life if you hope to fare well in the later part of your life. Rainy days will come. Make diligent provision for them."

I tell them that, going forth in this spirit, eager to put more into the world than they hope to take out of it, and possessing unshakable faith in the eternal laws of justice and righteousness, they will find life joyous, they will accept difficulties as a challenge to their manhood, that, doing the right, they will never be tempted to give way to despair, but will find their own life increasing in happiness and service with the passing years.

Above all, that they must not be drones, loafers, leaders; that they must exert themselves to the utmost to be useful; that through self-discipline and self-denial they may reasonably hope to earn the means to practice generosity and unselfishness.

Now, however, there is dangled before them the prospect of an earthly Utopia, ruled by a Santa Claus Government, pictured as prepared to shoulder responsibilities which I was taught could be and must be discharged only by each individual for himself, responsibilities which were portrayed not only as inescapable, but as essential to the development of sturdy manhood, development of the soul, development of sterling character.

I am somewhat troubled lest my own young men and other young men may imbibed the notion that hereafter there is to be less need for supreme effort, less need for self-denial and self-discipline, less need for sacrificing to save, less necessity for self-reliance, less occasion to worry over finding work to do in the world or to sweat to perform it unstintingly, less reason for systematically striving to provide for old age.

Perhaps this man is unduly concerned about the effect which all the loose talk of to-day about taking no thought of the future—that the Government will look after everybody at all times and under all possible sets of circumstances—is having on the youth of the country. Possibly his anxieties and questionings will prove wholly unwarranted. Let it be hoped so for his sake, and the sake of his four boys and of all other young men who may be tempted to disregard the teachings, the lessons and experiences of past generations and, throwing self-reliance and self-effort to the winds, become leeches on the state.

Nevertheless, all thoughtful and conscientious fathers and mothers must be perturbed as they witness the outpourings of dreamers and fanatics preaching false doctrines and seeking to wean the young people of to-day away from acceptance of and belief in those cardinal qualities which constituted the characters of men and women who have left their impress on the life and progress of the world, and lived useful lives. The worst enemies of youth are those self-appointed advocates and saviours who present to them as ideal a life of absolute contentment and leisure, free of personal responsibilities, free of worry, free of difficulties, with Governments playing the role of Santa Claus every week and month of the year.

## Chain Is Growing

The solid gold chain worn by the Lord Mayor of Dublin, worth \$50,000, has been handed down from official to official for the past 237 years without so much as a link being fished in transit. Indeed, it's the custom for the outgoing Lord Mayor to add a gold link to the chain as he passes it to his successor.

## There are 14 breakfast food

factories in Canada, of which 11 are in Ontario, two in British Columbia, and one in Manitoba. Canadian prepared breakfast foods have gained an international reputation, finding their way into almost every country of the world. The great amount, however, valued at \$2,500,000, goes to the United Kingdom.

## Improve Montreal Harbor

May Move Passenger Section Five Miles Eastward

Plans for the complete rebuilding of Montreal harbor were outlined at a meeting of the Montreal harbor commissioners. The plans would allow quicker access from the St. Lawrence river, higher water, easier dredging in the softer bottom and elimination of the St. Mary's current.

It was learned the harbor plans will in time move the whole passenger harbor about five miles eastward. The drawings show eight new piers, four of which will be long piers, likely accommodating two ships, while in between them are four shorter piers. It is expected the new piers will accommodate about 40 vessels.

Decision to move the harbor further east, it was learned, came after a statement by Chief Harbor Engineer Paul Lecallier that dredging is a much easier task in the softer bottom further down the river.

Moving of the passenger section eastward, with piers both allowing easier dredging which would deepen the water, is expected to bring larger ocean-going ships to Montreal. In time it is hoped to have the channel deepened to 40 feet. The St. Mary's current, which makes shipping at times hazardous is practically negligible further down the river, it was stated.

The new harbor development would cut down the time in the run from Quebec to Montreal by about an hour.

SHE PLAYS ORGAN  
AT 75 YEARSTakes Kruschen To Keep  
Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:

"My hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly strong and quite supple, and I am 75. I have recommended Kruschen Salts to many people."

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the primary cause of rheumatism. They also restore the eliminating organs to proper working order and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

## Branded As Traitors

Men Who Have Been Found Tampering With Voters' Lists

Men who have been revealed as tamperers of provincial voters' lists in the city of Montreal were branded as traitors to Canada by Rt. Rev. John Farthing, Bishop of Montreal, in his address to the 67th annual session of the synod of the Montreal diocese, Church of England in Canada.

Bishop Farthing expressed alarm at action had been taken against them and there had been no sign of public indignation. He called upon the Quebec government to institute a thorough, impartial judicial inquiry and to take action at the present session of the legislature to amend the law, if legally possible, so the roll could be thoroughly overhauled before the next provincial election.

## Proved Old Idea Wrong

Boston Man Grows Fine Flowers On "North Side"

Friends told John C. Fohn, Boston manufacturer, that flowers wouldn't grow if he built his conservatory on the north side of his home.

That was 10 years ago. To-day everything from lemon trees to cactus plants thrive in his "north side" conservatory, and he is famed in this section as a grower of fine flowers.

Though his golf score is usually in the lower 80s, he doesn't play much nowadays, preferring to devote his time to his other hobby.

The value of cut flowers sold in Canada during the year ended May 31, 1934, was \$876,203. This amount represents 62 per cent. of the total value of Canada's floricultural and decorative plant production, which includes outdoor roses, outdoor trees, shrubs, plants (outdoor and indoor), and flowering bulbs.

Because Englishmen prefer round nutmegs, Grenada, the West Indian island which grows the oval kind, will import seeds of round ones from the East and start new groves.

The skill of blind persons in using their other senses to guide and inform them was commented on as early as 1749 when Diderot published a "Letter on the Blind."

The first book of American cooking recipes has been attributed to Eliza Leslie, Bostonian, the date being 1830.

## Transportation In Future

Expert Thinks Aeroplane Will Be Used By Everyone

The electric street car will be a thing of the past within only five years, believes Peter Witt, nationally known traction expert and adviser to the Van Swearingen brothers of Cleveland, Ohio.

Witt based his forecast on development of the Diesel engine. In five years, he believes, nobody will travel long distances except by aeroplane.

"The Diesel engine, with its consumption of cheap oil and the wide cruising range it gives any vehicle it powers, is the engine and power producer of the future," Witt said.

Its present weight, now its major handicap, will be overcome by discovery of a new light, but tough metal that will bring it to a weight making possible its use exclusively in aeroplanes and automobiles, he said.

"We've moved so fast that at least one-third of the people in the United States are working at jobs now that were unknown 35 years ago. Just take the automobile, radio and aeroplane, with their allied groups, as instances."

## Currency Stabilization

Want Anglo-U.S. Conference To Settle The Question

Stabilization of world currencies was introduced into the budget debate in the British House of Commons by Sir Herbert Samuel, leader of the Liberal opposition, and other speakers.

"I wish the chancellor in his report had expressed a desire to secure a measure of stabilization of currency and could have told us some form of a conference is contemplated with the United States upon which, fully as much as upon ourselves and France, the decision rests," said Sir Herbert.

"Japan depreciates the yen, America the dollar, Belgium the belga, Britain the pound," Sir Herbert continued. "Depreciation is one of the prime reasons for the low level at which the state of the world continues."

"I regret the chancellor has made no survey of this important factor," Furney Braithwaite, Conservative, echoed Sir Herbert's sentiments.

## To Attract More Visitors

Canada Is Easing Up On Regulations For Tourists

The Canadian government is relaxing its customs regulations affecting tourists entering Canada in an effort to attract more visitors.

In future, the government will allow free entry to a number of articles, such as camping outfit, wearing apparel and other personal effects, heretofore admitted subject to deposit. It has extended the time limit during which tourists from abroad may stay in Canada without a permit from 24 to 48 hours.

Household furniture and other effects brought in by a non-resident for the temporary equipment of a summer residence and to be exported upon reporting them, to the customs office and depositing a sum of money equal to the duty taxes on the articles. The deposit will be refunded if the articles are identified and exported within eight months from the time of entry.

Wearing apparel and other personal effects are passed free without entry at customs.

## Cheap Railway Fares

One Cent A Mile Excursions From The East

One-cent-a-mile excursion facilities will be offered between May 15-29 inclusive from points in eastern Canada to the Pacific coast by Canadian railways, it was announced at Montreal.

Offered particularly for easterners wishing to visit western points these trips will include stopover privileges in the west on the going or return trip or both. Return limit is 30 days.

The total value of the imports of bulbs, plants, and shrubs imported into Canada in 1934 amounted to \$600,187. The Netherlands supplied 62 per cent. of these imports; the United States, 9.7 per cent; Belgium nearly 7 per cent, and Great Britain under 5 per cent.

Calls of many other animals are imitated by the tiger and panther, as well as by the hyena.

## Real Market For Seeds

Canada Imports Thousands Of Pounds From Many Countries

Since last July Canada has imported over 1,000,000 pounds of field crop seeds and 937,000 pounds of garden seeds not including flowers. Among the biggest importations are 464,000 pounds of alfalfa seed, 89,000 pounds of blue grass, 32,000 pounds of Cheving's fescue, 465,000 pounds of red clover, 130,000 pounds of Red Top, 98,000 pounds of perennial ryegrass, 149,000 pounds of timothy seed, 47,000 pounds of white clover, 242,000 pounds of mangel seed, 87,000 pounds of rape, 732,000 pounds of sugar beet seed, 125,000 pounds of vetches.

In the garden seeds there were 58,000 pounds of beans, 64,000 pounds of beet seed, 70,000 pounds of carrot seed, 123,000 pounds of corn, 15,000 pounds of cucumber seed, 27,000 pounds of lettuce, 28,000 pounds of onion seed, 297,000 pounds of pea, 81,000 pounds of radish, 81,000 pounds of spinach, 14,000 pounds of turnip seeds.

The sources of origin of these seeds is of interest; for instance the peas came chiefly from the United States and the British Isles, but there was also some from France, New Zealand, Holland and Japan. Over four hundred pounds came from Japan. The turnip seed came from the British Isles and the United States and also from Holland, Denmark, Japan and China.

The seed of kohi rabi was collected from the United States, Great Britain, Holland, Denmark and Italy.

The sugar beets came chiefly from Germany, but there were also sizeable amounts from Holland, Czechoslovakia, Poland, Britain, the United States and Denmark.

Spain enters into the picture in the onion seeds as well as the U.S.A., the British Isles, France, Holland, Italy, Japan and China.

## Something Went Wrong

English Firm Had Way Of Outwitting Japanese Cunning

They're telling this story in ship-building circles in England. Some years ago the Japanese admiralty invited a noted English firm to send specifications of a certain type of destroyers renowned for their speed and efficiency. The designs were sent, but after a long delay they were returned to the company with expressions of regret and thanks—they were not suitable to the Japanese admiralty. But in due course the Japanese launched several warships which exactly conformed to the British pattern.

About two years ago the Japanese admiralty again asked the same firm to submit plans of a destroyer type. These were sent, but were returned with the same apologies as before. A few months ago a new destroyer was launched which bore a suspiciously outward resemblance to the type designed by the British company. But the moment it took to the water, the boat capsized.

Wonder how that happened? Anyway, the Japanese are not likely to ask for any more blue-prints.—St. Thomas Times-Journal.

## Dominate Cotton Industry

Japanese Wrestling The Industry From Chinese Territory

Japanese commercial expansion in North China has reached the point of almost complete domination of the cotton industry, most important enterprise in the area, with only one mill remaining wholly under Chinese ownership.

Threats of actual military penetration of this region, formerly the seat of the Chinese dynasty, have long since died down, but observers point out the Japanese conquest of the vast territory north of the Yellow river continues with Japanese capitalists, diplomats and businessmen taking up where the soldiers left off.

The millman is becoming quite diversified in his line of products. Not only does he deliver orange juice, eggs, cheese and milk to New York residents, but in Providence he has added oysters to his morning deliveries.

There are now 35,000,000 telephone subscribers in the world, and 32,000,000 can speak to each other.

## Little Journeys In Science

## SOAP

(By Gordon H. Guest, M.A.)  
When fat or oil and alkali are heated together under proper conditions soap and glycerin are produced. Soap is made commercially on a very large scale. The oil or melted fat is poured into huge kettles together with a solution of lye. As a rule the kettles are very large, 500,000 pounds or more of soap being made in some of them in a single heating. They are provided with coils of steam-pipe for heating the liquid. The fat and alkali are stirred by the forcing live steam into the bottom of the mixture. The chemical reaction which takes place in soap-making is completed in about one day.

The soap is then suspended as very fine particles in the liquids present, or the chemist would say that the soap is in the form of a colloidal dispersion. To obtain the soap in the solid form common salt is added and this process is known as "salting out". After the salt is added and the mixture heated, the soap rises to the top of the liquid and the soap thus obtained is purified by washing and settling processes and is then run into the mixing machine called the crutcher. Here it is mixed with substances such as perfume, borax, water-glass, or washing soda. It is then run into large molds called frames to harden, after which it is cut and pressed into cakes of the desired size.

Transparent soaps are usually made by dissolving dry soap in alcohol and adding from 15 to 25% of sugar. Cattle soaps are made of olive oil. The colour of mottled soaps is produced by the addition of Prussian blue or some similar pigment. Floating soaps owe their lightness to bubbles of air and naphtha soaps contain about 5% of petroleum naphtha. Scouring soaps contain from 5 to 10% of soap material from 80 to 90% of some material such as fine sand or volcanic ash. Soap powders usually consist of a mixture of washing soda and ground soap to the extent of 10 to 25%.

## Strange Substance

Produce Hormone That Has Effect Of Turning Wild Animals

Isaiah's prophecy that the lion and the lamb shall lie down together and a little child lead them was shown to be a scientific possibility at the American Philosophical Society meeting in Philadelphia.

The chemical substance to tame both animals is available if anyone wants to try it out. The society was shown motion pictures of a fierce, flesh-eating, grown rat lying down with a new-born aquab and trying to mother it. The pictures were shown by Dr. Oscar Riddle, of the Carnegie Institution of Washington.

The rat had received an injection of prolactin, a hormone produced by the pituitary glands of human and all mammals, including lions. The rat was an untrained female, with nothing but wild instincts, and no previous experience with mothering anything.

The prolactin induced immediately a maternal instinct so powerful as to make the rat's natural appetite for eating young equals.

Prolactin was discovered three years ago by Dr. Riddle. Previous experiments with it indicate that it acts on all animals in similar fashion. Its primary function is to cause female mammals to give milk for their young. It has done that even when given to males.

## Walking Was Quicker

German Pedestrian Covered Mile Quicker Than Street Car

A race between a pedestrian and a street car was won in Brunswick, Germany—by the pedestrian. The challenge was accepted by the company following public complaints that the cars were too slow. A local journal, 40 years old, and burdened with a suitcase fully packed, covered a lance of one mile in six minutes, 54 seconds, while the car came in a bad second in its scheduled time of eight minutes. The race was run with referees, stop-watches, and finishing tape.

## Amending British North America Act May Result In An Entirely New Constitution For Canada

The matter of amending the British North America Act is one for discussion between the Dominion and the provinces, according to various provincial attorneys-general, telegrams from whom were read to the parliamentary committee considering the B.N.A. Act.

The provincial administrators believed the Dominion should formulate its plan first and then submit it to the provincial authorities, after which a conference would ensue.

"The question of what, if any, provision is to be made for amendment of the Canadian constitution from time to time," said Hon. T. C. Davis, attorney-general for Saskatchewan, "is one which ultimately must be decided by conferences between the governments of the provinces and the government of Canada with the possibility of a previous preliminary inter-provincial conference. In view of this fact it would appear to be unwise for the provinces to be giving their views before a committee of the House of Commons."

Mr. Davis suggests the committee make its report to the house and that this report be made available to the provinces.

Hon. W. J. Major, for Manitoba, declared he would submit recommendations after prorogation of the provincial legislature.

New Brunswick declared that a brief would be submitted to the committee after adjournment.

Amendment to the B.N.A. Act should take the form of an entirely new constitution for Canada, and it should be drafted by a constituent assembly representative of the whole people. Dr. Arthur Beauchamp, clerk of the House of Commons, told the committee studying the proposals to amend the Act. The imperial parliament should, after Canada's new constitution was written, be requested to repeal the Act.

Enlarging upon the suggestion, Dr. Beauchamp declared the personnel of this constituent assembly should be representative of the senate, the house of commons and the provincial legislatures and should be one-fourth of the present number of each.

That was to say, the senate, with 96 members normally, would have 24 representatives in the constituent assembly. The House of Commons would, with its 245 members, have 61. The provinces would be proportionately represented as follows: Alberta, 16; British Columbia, 12; Manitoba, 14; New Brunswick, 12; Nova Scotia, 8; Ontario, 23; Prince Edward Island, 4; Quebec, 23, and Saskatchewan, 16. The total representation would be 223.

This constituent assembly would meet at Winnipeg, summoned by proclamation issued by all the legislative bodies involved. It would be clearly set forth that "minority rights" preserved under the present British North America Act, would not be discussed. The representation would be drawn from all classes.

"There ought to be no government side nor any official opposition in such a body," said Dr. Beauchamp. The assembly would work on the lines of coalition. A committee of premiers and leaders of the opposition in the House of Commons and legislatures would have charge of the agenda and daily order of business.

At the first meeting each province would present its case, and committee would deal with every chapter of the British North America Act. Such matters as reducing membership in the House of Commons, election of senators, fisheries, Companies Act, insurance laws, radio and other questions would be thoroughly thrashed out.

One item to be decided would be whether Canada would alter its name from a Dominion to a kingdom.

Once a constitution had been adopted by the assembly, Dr. Beauchamp continued, it should be approved by each province and by the Dominion, then it should receive the assent of the king. Such a procedure would apply to subsequent amendments which would require a majority of two-thirds of the respective legislatures.

Dr. Beauchamp was opposed to continuing provincial autonomy. There should be a readjustment of taxation and expensive services should be transferred to the Dominion. Each province should pay the salary of its own lieutenant-governor, who would, however, continue to be appointed by the Dominion. Similarly the provinces would be required to pay the judges of their own superior courts.

Dr. Beauchamp urged establishment of a Canadian judicial committee of the privy council.

### Historic Spot

In a quiet garden of a residence in Martintburg, Natal, a company of distinguished people honored a distinguished personage by a tree telling of its place in history.

### Choosing Fertilizers

Provincial Governments Assisting In Work For Benefit Of Farmers

This is the time of year when farmers are purchasing or considering the purchasing of fertilizers for the various farm crops.

Until quite recently, farmers who had not made a study of fertilizers usually depended upon the local fertilizer agent to advise them as to the particular analysis they should use, and unfortunately the advice from this source was not always in the farmer's best interest. A more acceptable source of information is now at the service of farmers, for the Provincial Governments in Eastern Canada have in recent years set up fertilizer councils composed of leading authorities in agricultural chemistry, farmers who have a practical knowledge of the use of fertilizers, and representatives of fertilizer manufacturers. These councils publish recommendations as to the analyses most suitable for the various crops under the various soil conditions, and thus are performing a valuable service to farmers in assisting them to select fertilizers which promise the most economic returns.

The fertilizer division of the Seed Branch, Dominion Department of Agriculture, commends the work of the Provincial Fertilizer Councils for the guidance afforded by them to farmers in solving fertilizer problems.

### Reduction In Insurance Rates

25 Per Cent. Reduction For Freight Traffic Over Bay Route And Season Extended

A 25 per cent. reduction in the cargo insurance rates on freight traffic over the Hudson Bay route has been granted by Lloyd's.

Coupled with this is an extension of a month and five days in the open season for which insurance may be obtained.

Last year's rates will apply for the extension period.

Announcement of the new rate was made at Regina by Hon. W. J. Patterson, minister of natural resources and minister in charge of the insurance act.

Announcement of a 25 per cent. reduction in hull insurance has already been given out from Ottawa.

Word of the new cargo rate came by way of cable to R. H. Cook, Regina agent of Lloyd's of London.

The new rates, effective between August 10 and October 10, will be three quarters of one per cent. as compared with one per cent. formerly.

For the extra month at the beginning of the season the one per cent. rate will apply. For the open day extension at the end of the season the rate will be 1 1/4 per cent.

Change in the open navigation season was sighted by apt enthusiasts as definitely opening the way for traffic in binder twine for use in harvest fields of western Canada.

### Canada's Gift

Beautiful Box Of Solid Gold For Presentation To His Majesty The King

A gold box, gift of the Dominion of Canada to King George V. on the occasion of his silver jubilee, was made in Montreal, and shipped from Ottawa to London for presentation. The box, made of solid gold, is 18 by 14 inches and approximately three inches in depth. On the cover is a presentation plaque, surrounded by the hand-engraved coats-of-arms of nine provinces. Below the plaque, the coat-of-arms of the Dominion has been applied. The border of the cover is made of individual maple leaves in gold.

The raised letters, G.R.I., flanked by crests, have been affixed to the front. On the underside of the lid a picture of the parliament buildings at Ottawa has been hand engraved. The legs are covered with wrought maple leaves and the box is lined with fine blue silk.

### Queen Marie Takes Credit

Marie, Dowager Queen of Rumania, in her autobiography takes credit for bringing Rumania into the Allied ranks during the Great War and keeping it there even after the little nation was exhausted. Marie describes her activities in "Ordeal: The Story of My Life."

### An Ancient Lock

Popular Mechanics says one of the prized possessions of Charles Courtenay, New York locksmith, is an ancient lock in use some 2,000 years ago on the entrance to a public bath in Jerusalem. It is a wooden tumbler lock and the key is of forged iron.

The cost of living index in Great Britain is 42 per cent. above that of 1914.

Iceland's capital, Reykjavik, has a thoroughly modern hospital of 100 beds.

### National Income Higher

Increase In Canada Over 18 Per Cent. Last Year

Reflecting definite economic improvement, Canada's national income increased 18.9 per cent. in 1934, according to the estimate made by the Financial Post Business Year Book.

Average per capita income in the Dominion during 1934 is estimated at \$383 compared with \$328 in 1933. Ontario held first place among the provinces with an average per capita income of \$510, and incomes in all provinces showed gains. Better prices for almost all kinds of farm produce, particularly grains, raised incomes in the Prairie Provinces. British Columbia benefited considerably from marked improvement in lumbering, fishing and mining, although prices showed only slight change from 1933. Recovery of the pulp and paper industry, continued activity in textiles and expansion in electric power consumption combined to make Quebec the leading province in point of improvement over 1933. Ontario, as usual, showed a gain almost commensurate with that of Canada as a whole. Manufacturing, mining, and agriculture all showed increases. New Brunswick showed the largest gain for the Maritimes, largely as a result of increased pulp and paper and lumbering operations. An advance took place in Nova Scotia as a result of greater activity in lumbering and mining, offset to some extent by low prices for apples—one of Nova Scotia's important crops. The improvement in agriculture in Prince Edward Island, in common with the rest of the Dominion, was the prime cause of a small gain in that province.

### Becomes Opera Star

Efforts Of Poor Korean Boy Have Been Rewarded

From newspaper carrier to operatic star in less than a year is the fairy-like rise in fortune of a 23-year-old Korean youth, Kim Sambock. He has been selected for the role of Pinkerton in the opera *Madam Butterfly* by Noham, Japanese wife of John Gadsby, Japanese baritone of Tokyo, which she will stage in Tokyo with herself in the title role. Miss Hara is an internationally-famed singer and has a high reputation in Italy.

Kim lost his father, a penniless fisherman, and his mother, when he was five years of age. In abject poverty he managed to get a schooling of sorts. When he was 17 he travelled from Korea to Tokyo, walking most of the way. Obtaining employment as a newspaper boy and picking up various odd jobs, he managed to save enough money to take singing lessons. Finally he bought a cheap piano on the instalment plan and added additional work as a chorus boy.

Last autumn he called on Miss Hara, who was so struck by the richness of his voice she undertook to train him. For long tedious months she personally supervised the routine for her pupil, and Kim proved himself an apt pupil. Then came the announcement she had chosen him to take the leading male role in the famous opera.

### Placing The Responsibility

Austria-Hungary Foreign Minister In 1914 Says He Was Opposed To War

Count Leopold von Berchtold, foreign minister of Austria-Hungary in 1914, told an Austrian interviewer that Germany was "chiefly responsible" for Austria-Hungary's declaration of war against Serbia which precipitated the Great War.

Denying he had urged the declaration of war, the former foreign minister said he was opposed to war and might even be considered a pacifist. Germany, he said, played a preponderant role in Austria-Hungary's decision to declare war. He would be glad to lead up to the "hard words" of Kaiser Wilhelm II. to Von Tschirschky, German ambassador in Vienna. When the latter advised the Kaiser against attempting to force matters, the answer was, Von Berchtold said, to ask him who had authorized him to take such an attitude. The Kaiser, he said, added, "they will say later that Germany did not wish it."

### Value Of Newspapers

Among The Finest Text Books In The Field Of Commercial Education

Daily newspapers are "among the finest text books" in the field of commercial education, C. I. Blanchard, New York, told the commercial section of the Ontario Education Association at Toronto. "We must utilize to the maximum the financial sections of the daily news," he stated, emphasizing the need for education in making of investments.

### Heads Alberta Teachers

Election of Gordon G. Harmon, principal of Westmont public school, Edmonton, as president of the Alberta Teachers' Alliance executive council for the ensuing year was announced at the annual convention of the Alberta Educational Federation. He was given acclamation to succeed E. J. Thorlakson of Calgary.

### EX-KAISER VISITS FLOWER SHOW

Here we see a Dutch girl from Volendam presenting the ex-Kaiser with a buttonhole on his arrival at the great flower show at Heemstede, Amsterdam.

### Some Interesting Records

Strange Things Found In Going Back Through Years

Many years ago, when child labor in England was an accepted fact, Frederick George Davies, nine years of age, applied for a job with a Southwark firm of wholesale grocers. He got the job and stayed with the firm until he died recently at the age of 89. He had worked for the same concern for 78 years... which looks like a record. Another record was set up by the Rev. Frederick Laurence, who was fined in Reading for careless driving. It was his first offence in 39 years of motoring, but he paid a fine of one pound and costs of two pounds just the same. And now, seeing we are going back through the years, let's go the limit. Arctic insects have been discovered on the top of a Scottish mountain by a party of entomologists, and have been added to the Natural History Museum in South Kensington. That does not seem a world-beater on the face of it... but these insects have been considered extinct since the Ice Age!

### Caribou Killed By Grubs

Ottawa Official Has Solved Mystery Of Barren Lands

Trappers of the Barren Lands who for the past two years have come across dead and dying caribou which were victims of disease may now have an answer as to the cause of the malady that killed so many animals.

Dr. Seymour Hadwen of the department of animal husbandry, Ottawa, and formerly with the University of Saskatchewan and the federal livestock department at Washington, says that it appears clear that the caribou were victims of penetrations of the reindeer warble fly grubs.

### Had Strange Malady

California Man Recovering From Disease Which Caused His Body To Shrink

Rapid recovery from a disease which made George Bocklett, 45, look and feel like an "ape man" was reported by Dr. Frank Nolan, Hollywood physician and surgeon.

Dr. Nolan attributed the improvement in Bocklett's condition to intravenous injection of a "life restoring" serum which he labelled as "formula X" for the sake of secrecy. Bocklett who was gradually shrinking in size has left the hospital.

The physician declined to disclose the composition or source of the secret serum which he claims is restoring the "shrinking man" to normal appearance.

The deformation resulted in Bocklett losing four inches in height in a year, and his hat size increased from 6 3/4 to 8 1/4. Bocklett also suffered a spinal curvature which, he said, caused him to feel "like an ape." His rib and chin bones also shrunk.

### New Mounted Police Post

Detachment Of Force At Fort Harrison On Eastern Coast Of Hudson Bay

Opening of only one new post in the Northwest Territories is planned this season, stated Major-General J. H. MacBrien, commissioner, Royal Canadian Mounted Police, in Edmonton on an inspection trip. Plans call for the placing of a police detachment at Fort Harrison on the eastern coast of Hudson Bay, which is some distance north of Fort Churchill and on the opposite side.

Operating from an alternating current light socket, a new electric device both grinds and strips safety razor blades in a few seconds.

## The SNAPSHOT GUILD

SPRINGTIME IN THE ZOO

Get environment in your zoo pictures. It adds much to their interest.

"What is it we always look forward to seeing in the spring?" a teacher asked her class of eight-year-olds. "The animals in the zoo," cried up Mickey.

Mickey might have added "and snapshots," for there are in this world a few people who park their cameras on the closest shelf at the first sign of winter and, like the bear in the zoo, it hibernates until the arrival of spring.

If you own one of these hibernating cameras you had better get it out, dust it off, carefully clean the lens, load it up with film and be on hand at your nearest zoo when the keeper lets his animal family out of the indoor winter quarters to the outdoor cages. There's a real chance for some great pictures and a great chance for some real pictures.

There's one great advantage in taking animal pictures at the zoo in early spring. The foliage on the trees is not as heavy as it becomes later in the summer as your light is much better.

Background and foreground should be given equal consideration in taking pictures of animals and fowl at a zoo. In other words, try to get environment in your pictures—natural settings. Don't just walk up to

the cage or corral and shoot. If the lion's den, for instance, is at the back end of his cage, which it usually is, don't snap your picture from the side and have an adjacent pen of ostriches for your background, for in natural surroundings the lion and ostrich do not mix socially. Get as close to the bars of his cage as you can and shoot.

"But," you may say, "if I snap him when he is right up against the bars I would get a larger image." That's true enough and at the same time you would be getting just another picture of a lion. Suppose the image of the lion is smaller at a greater distance from your camera. How about an enlargement of the lion and enough of the entrance to his den to add environment.

Many amateurs overlook the possibilities in trimming and enlargement and in doing so they pass up the opportunity to "change what would be an ordinary snapshot into an outstanding photograph."

Keep these things in mind when taking all kinds of animal pictures—wild and domestic. Get environment in the picture and you will soon be convinced by results that it is worth the little thought and effort it requires.

JOHN VAN GUILD.

## Interplanetary Communication And Other Wonders Forecast By American Chemical Society

### Livestock Show

Western Livestock Men Plan To Hold Western Royal Show Annually

A "Western Royal" livestock show, along similar lines to the Highland show in Scotland and the Royal Agricultural Show in England is in process of formation by prominent livestock men in the west.

The plan is to hold a combined livestock show annually, the show being rotated in turn between the provinces of Manitoba, Saskatchewan, Alberta and British Columbia. In this way stockmen hope to create a keen interest in livestock in each of the western provinces by making a great exhibit of livestock easily accessible to the western Canadian public.

Promoters hope for the same co-operation and support for the western venture from eastern livestock interests as has been extended by western stockmen to the Toronto Royal show in past years.

Inter-provincial competitions will be featured for each of the breeds as the show is being organized in provincial units, the livestock being composed of the presidents of each of the provincial breed associations and breed clubs.

The responsibility of getting out their most attractive and representative exhibits is being placed directly on the shoulders of the breeders and club. This, it is felt, should develop a friendly rivalry in inter-provincial competitions and result in a combined exhibit of the very best in livestock that western Canada has to offer the public.

Stockmen interested in the project declare the depression is over for livestock and it is again taking its proper place in western agriculture.

### Maple Syrup Throughout The Year

Production High And Price Expected To Be Lower

Production of maple syrup and maple sugar this year in Eastern Canada promises to be higher than for several years past, according to the Fruit Branch, Dominion Department of Agriculture, and consequently the price is low. The season opened early in March in Southwest Ontario and is now about to close in Eastern Quebec and the Maritime Provinces.

Notwithstanding the general high quality of maple syrup and maple sugar produced in Canada, the Department points out that the per capita consumption of maple products in the Dominion is only 2.7 pounds annually. Most of this is consumed in the spring time, for the reason that it is generally known that maple products can be kept throughout the year. Any fear that the syrup will ferment in cans that have been opened may be obviated by removing the syrup from the cans when purchased in the spring, heating the syrup, putting it in glass sealers, and storing in a cool dry place.

Export of Canadian maple products to the United States, which, for some time, was the principal market, is now restricted, due largely to a tariff of six cents per pound on maple sugar and four cents per pound on all maple syrup. This year's supply of maple products will be sufficient to meet all domestic demand.

### Show Need Of Rest

"Buzzers" In Human Body Warn People Of Breakdown

Some persons have a "buzzer" system which warns them of an approaching nervous breakdown, said Dr. Walter Freeman, professor of anatomy at George Washington University.

Dr. Freeman defined a nervous breakdown as "discomfort in its widest sense without underlying organic cause, leading to a degree of disability in the patient."

When it happens to a person of 40 or thereabouts, he said, it may be advantageous since it will cause the person to "slow down," and thus may forestall a "fatal circulatory system breakdown" two decades later.

Grouchiness, sleeplessness, headaches, pains, and worry all are symptoms of a nervous breakdown, Dr. Freeman said.

Some persons, he pointed out, have specific "buzzers" which warn them of the approach of a breakdown or its repetition. He said a man may have a peculiar throbbing in his left wrist and whenever that starts, "he knows he must take a rest."

Solicitor at Wood Green, to a woman: Has your husband any ambition. Yes. He is very eager to draw the old-age pension.

Switzerland has a large railway bridge which can be stored during the winter to protect it from avalanches.

London received its first successful cargo of meat from Australia in 1860.

Complete defence for women and children in war, no more growing old but living a whole life at 22 or 35, and giving Mars some water or Venus some oxygen in her atmosphere were forecast by Thomas Midgley, vice-president of the Ethyl Gasoline Corporation.

These forecasts for the next 100 years were released by the American Chemical Society, celebrating the tricentenary of chemistry in America.

Dr. Midgley said the forecasts probably do not overstep the boundaries of accepted natural laws. Some of them are certain, others may be delayed, and it is not possible to predict which. But it is certain, he thought, that there will be an end of cold, flu, tuberculosis, possibly cancer and many other ills.

In the synthetic home in the next century, he said, you will throw off the bed clothes by snapping your fingers, warm the room instantly by pushing a button, then throw your pyjamas into the waste basket, for then cellulose goods will be so inexpensive it will be cheaper to throw them away than to launder them.

"Indigestion will be unknown," he said, "for with discovery of certain hormones in the stomach of the boa constrictor, it will no longer be necessary to stay up after eating to digest one's dinner—just a box pill and right to bed."

"Sleep will be undisturbed and bad dreams banished. There will be 'dream tablets,' chemicals inducing only pleasant dreams, or other tablets stopping all dreams."

"Engineering," he said, "is already waiting for chemistry to give a fuel which will be capable of releasing more energy per pound than is required to lift that pound out of the earth's gravitational field. Given such a fuel, interplanetary travel will be possible."

"I do not want to give the impression that interplanetary transportation will become a commonplace immediately. Considerable preparation of environment will be necessary. Mars will need water; Venus a new atmosphere, all of which will mean work for future chemists and engineers."

Chemistry and physics will develop defensive weapons in war to offset any sort of destructive progress.

"The control of the age cycle," he went on, "will become a fact, making it possible for an individual to order long life, except for accident." Agriculture will be speeded by controlling the amount of ozone in the atmosphere and other ways particularly with synthetic hormones to promote growth.

"In this way there will be a much greater and more rapid meat production," Dr. Midgley explained. "A century hence chickens will be the size of pigs, pigs the size of cattle, and cows and bulls as big as mastodons, yet the food consumed to accomplish this will be no greater than used at present."

### Irish Discovered America

Dr. Stefanon Has New Theory Concerning History Of New World

Dr. Vilhelm Stefanon, Arctic explorer, says the Irish discovered America six or seven centuries before the voyage of Christopher Columbus in 1492.

The explorer told the Pennsylvania Historical Association the pope has documents to support his claim. "We'll probably never know the name of the man who discovered America," he added, "but we may be positive he was an Irishman."

Stefanon described a paper written by an Irish monk in 820 A.D. telling of colonization of Iceland by the Irish at that time and said Vatican records show the pope in 1126 made Greenland a separate bishopric which had an unbroken line of bishops until 1528.

### Fingerprints By Wireless

Scotland Yard Has Tried Experiment For Some Time

The transmission of fingerprints by wireless is being successfully carried on by Scotland Yard.

The experiment has been in progress for some months and authorities believe that it will soon be possible to send life-sized fingerprint photographs speedily over any distance by radio.

The expense involved is at the moment prohibitive, but experts foresee the time when, in urgent cases, portable apparatus will be used to transmit the fingerprints direct from the scene of a crime to Scotland Yard records.

Woman—Why did you pick out such a pretty cock?

Friend—My husband is away a great deal and I wanted to have police protection.

Felting, China, "the world's dustiest city," suffers from dust storms that blow in from the Gobi desert.

### Calgary Lad Electrocuted

Calgary, May 21—Wm. Ford, 18,  
son of Clinton J. Ford, K.C., was  
electrocuted here tonight when he

disregarded the warning of friends  
and touched a 4,400 volt power line  
while at the top of an electric light  
pole. The lad, who was killed in-  
stantly, had climbed the pole while  
playing with three chums.

### BANKING IDEALS THAT LIVE ON

"The value of that enterprise (the Bank of Montreal) ought not to be measured by its success as a joint-stock undertaking, by the amount of its capital or the size of its dividends, but by the security it has given to those who have trusted it, the facilities it has furnished for the exchange and the increase of commodities, and the assistance it has contributed to the development of the country."

The Bank, now well on in the second century of its life, still wishes to be measured by the considerations mentioned in the foregoing quotation from "The Centenary of the Bank of Montreal," published in 1917.

Security, facilities, assistance—those have been the objectives of the Bank since its foundation in 1817. They are the objectives today and will be in the tomorrows of Canadian life.

### BLAZE ABOARD SUPER VESSEL

London, May 22—A dispatch to the Daily Mail from its La Havre correspondent said today a mysterious fire had been discovered in a room near the bridge of France's new super liner "Normandie."

A quantity of gasoline was reported to have been found inflamed, but the fire was speedily extinguished. Two men were arrested in connection with the fire.

### LITTLE ADVANCE IN WORLD TRADE

The April number of the monthly bulletin of statistics of the League of Nations contains information on the value of world trade and trade by countries in the years from 1929 to 1934. World exports were about

three per cent lower in 1934 than in 1933. The exports from South and North America and Asia were slightly higher. European exports were lower by five per cent. European imports in February were down about seven per cent, as compared with the same month last year, while North American imports increased seventeen per cent, and those of Asia eleven per cent. The returns on industrial activity for February are reassuring. They show an increase in Canada, Chile, Denmark, Italy and Norway. In France there has been no change.

The latest figures dealing with shipbuilding show increases in Great Britain, Germany, France and several other countries. Part of the activity is due to the construction of war vessels.

### JOINT POLITICAL MEETINGS

The Edmonton Journal, in commenting on an opinion expressed by the Calgary Herald, says: "Joint political meetings are certainly much more likely to clarify thinking on subjects of public concern than can be expected from those at which only one side is presented or from radio

addresses. When a speaker is liable to be challenged immediately, he naturally is more careful in his statements and less likely merely to appeal to prejudice. By all means let arrangements be made to have the system put into effect on an extensive scale in the course of the coming contest. It will help greatly in bringing about a more intelligent verdict at the polls."

Canada's 92,000 hospitals, beds require an annual maintenance budget of almost \$51,000,000; there are 482 general hospitals with well-equipped X-ray departments, and 331 hospitals with good physical therapy departments. It costs from \$3,000 to \$4,500 per bed and more to build a modern, up-to-date hospital; it costs approximately \$300 to adequately equip a private room; X-ray equipment costs from \$2,000 to \$15,000 or more, and physiotherapy costs from \$1,500 up.

Miss Gladys Jemson, who has been ill for the past ten days in Lacombe hospital, returned home today. Her many friends will be glad to know that she is well on the way to recovery.

### LACOMBE CHOR WINS AT EDMONTON FESTIVAL

Edmonton, May 21—St. Andrew's United Church, Lacombe, scored a triumph at the Alberta Musical Festival on Tuesday when, under Lawrence Wright, it won the event for church choirs for towns not exceeding 3,000.

It scored 166 marks, against 164 for the second place by United Church choir of Camrose.

Christ Church, Edmonton, won the intermediate choir event with 170. The small church choir event was won by United Church, Camrose, with 165.

### WEBB PRIZE WINS DOMINION TITLE

W. S. Frizell, of Lacombe, won the Dominion championship in the 126 pound flyweight boxing class in Edmonton last night. Webb won his bout against Frank Margang, of Regina, 8-1, by decision.

### CANADA'S CREDIT IN LONDON

Mr. Bennett can hardly have meant by his statement yesterday that Canada's credit in London has been destroyed permanently. But for the time being it has been damaged so seriously by what has happened in Vancouver and in Ontario that Canadian loans cannot be floated in the Old Country. That has been all too evident. It was planned, the premier told the house, to launch a dominion refunding loan in the United Kingdom, which would have led to an annual saving of \$700,000 but the project had to be abandoned. No one who knows anything about the London market could have been in any doubt as to what the effect would be on British investors of the steps taken by the Vancouver mayor and the Ontario premier. They were bound to lose all interest temporarily at least, in Canadian securities.

Mr. Hepburn says that Mr. Bennett's statement shows he is "again fighting in the corner with special choice interests." Why should any such conclusion be drawn? The Federal premier did not have the power to prevent the unfavorable impression in Britain to the policies adopted in Vancouver and Toronto. All that he did was to call attention to how much they have stood in the way of securing British funds for Canadian public purposes. Financial help from the old country is and will be increasingly needed not only by our governments but our private enterprises need to have it cut off cannot be to the interest of the dominion. Mr. Hepburn insists that Canadian credit never stood higher and cites the success of the recent federal loan. But it was subscribed in Canada and its outcome does not alter the fact that a similar one could not at present be carried through in London.

AMAZING low prices  
for Quality tires

Goodrich  
Safety  
Silvertown

Why take chances with blow-outs when Goodrich Safety Silvertowns will give you Life-Saver Golden Ply blow-out protection—and months more mileage at no extra cost. Let us show you the Safety Silvertown today.

Goodrich  
Cavalier

Why buy single-cured tires when the price of double-cured Cavaliers is so low? "Double-Curing" makes Cavaliers tough all the way through! They will still be "Burning up the Miles" long after single-cured tires have been thrown on the junk heap.

Goodrich  
Commander

Why buy cheap, unreliable tires when you can get Goodrich Commanders? They're tough, long-wearing, honestly built. Protect your tire investment. Insist on Goodrich Commanders—and save money.

LOOK FOR THE MOUNTIE

WORLD HAPPENINGS  
BRIEFLY TOLD

Birmingham, which now claims to be England's most prosperous industrial city, is assisting Liverpool by finding work for unemployed juveniles.

Aliens will not be qualified to vote in school districts which have been established for 10 years or longer, under the terms of an amendment to the School Act which was passed by the Alberta legislature in committee of the whole.

A small ballad of a type sent up for meteorological observations has been found by two Indian trappers in the bush 80 miles west of Sudbury. There were no identifying marks on the ballad to indicate from where it came or its purpose.

As a token of goodwill and loyalty in connection with the king's silver jubilee, Windsor, Ont., has sent to Windsor, England, a souvenir plaque made by the Windsor-Walkerville vocational school from a piece of oak taken from the city hall.

Three Germans were arrested in Algiers on orders from Marseilles as they prepared to depart for Southern Algeria, giving rise to the belief that France had uncovered a new spy plot, this time in one of her colonial possessions.

Signal honor was paid Speaker George N. Johnston just before the provincial legislature convened at Edmonton, when the house decided that "the chair occupied with such dignity for so many years has been the personal property of the speaker."

A committee will be appointed shortly by the Ontario government to inquire into the whole financial structure of education. Hon. Paul Jodine, Ontario minister of mines, told the separate school trustees section of the Ontario Education Association.

William "Bill" Brooks, the Halifax war veteran who walked on foot to the Canadian corps reunion in Toronto last year and then walked back to Nova Scotia, is in Montreal on a hike to Vancouver. A checkmate in war in Vancouver prompted "Bill" to take to the road again.

## Washington State Claim

Matter Of Damages From Sulphur Fumes At Trail, B.C., Near Settlement

The state department at Washington has announced that a convention for the final settlement of the controversy arising from damage done in the state of Washington by sulphur fumes from a smelter at Trail, B.C., was signed at Ottawa.

The convention, signed by Prime Minister R. B. Bennett, for Canada, and by Pierre L. Boal, charge d'affaires, for the United States, provides for the appointment of a joint arbitration tribunal which will pass on all damage alleged to have been done to Washington forests, crops and livestock, since Jan. 1, 1932.

The tribunal will consist of jurists named by the United States and Canada with a chairman to be appointed by both governments from some neutral country.

The convention must be approved by the United States senate and the Canadian parliament.

State department officials said it would be transmitted to the senate immediately for the earliest possible action.

The convention also provides that the Canadian government will cause to be paid \$350,000 for damages up to Jan. 1, 1932, as recommended by the report made by the international joint commission in February, 1931.

The tribunal also is expected to make recommendations for the installation of fume elimination apparatus or other measures to prevent future damage.

## Aid For Passengers

Time Table Is Produced By Pressing A Button

An invention recently installed in the Victoria Station in London allows the railway passenger to press a button and produce on the instrument's illuminated window a time table for the station desired. Each station is numbered; pressing the correspondingly numbered key brings a printed card into view bearing the complete schedule of trains between Victoria and the station in question.

Similar machines are to be installed at all the principal stations on the Southern Railway, the London Times reports.—New York Sun.

## A Distinction For Thursday Island

During their present world tour, Lord and Lady Baden-Powell found the greatest number of Scouts and Guides to population in an unexpected place—small Thursday Island, off Queensland. From some 700 inhabitants—400 whites and 300 Malays and Japanese—200 Scouts and Guides greeted the World Chief Scout and Chief Guide.

London, England, museum has placed on exhibition the copper kettle said to have contained the porridge of which Oliver Twist asked for more.

In the Middle Ages stewed roses were a popular desert and violets were often used in soup along with onions.

## Mosquitoes Always Were

Specimen Preserved In Amber From 600 B.C. Found

In the year 600 B.C. mosquitoes apparently were just as annoying as the modern species. If size is any indication, a mosquito whose proportions are larger than those of its average present-day descendant is preserved in pure amber owned by H. C. Page, East John.

Geologists estimate the insect was entombed more than 2,500 years ago. The neatly cut piece of amber, crystal-clear, preserved the mosquito perfectly, including even the fibrous hairs on its body and legs.

Amber, a solidified refinement of tree balsam, is found mostly in the bluish-brown fossil of timber along the shores of the Baltic and other parts of maritime Europe, Page said. The jewel in his possession came from the northern coast of Russia, where vast areas were under water for centuries.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

Here are some replies to letters received from readers. Others will find them interesting, too, as showing just what Graphology can do for you. Miss B.L.: You are inclined to be somewhat highly-strung, and are apt to get easily excited when things do not go just as you would like. This is not a weakness in the ordinary sense of the word; it is more a temperamental disquietude, and about because you are so swayed by your feelings. You are so quick to feel joys and sorrows, and will probably suffer a good deal as a result. Yours is not a nature that would and nursing a very suitable occupation, and it is fortunate that you recognized this and discontinued your training. The ideal nurse needs to be well-controlled, able to "keep her head" in emergencies, and at the same time to be sympathetic and kindly. You do have the latter traits, but certainly would not show at your best during tense moments. You are independent, in the sense that you are chary of accepting the help of others. And you have a good regard for order and neatness and are careful about details. All in all, you should do fairly well at your office work, and be far happier than in the occupation of nursing.

Mr. A.G.T.: You have a fairly normal nature, with a slight leaning toward ardor, but by no means intensely emotional. Your sense of judgment is well to the fore, and, as a rule, prevent you from doing anything too impetuously. You are, perhaps, too prone to view the future a little cynically, without that faith and ambition that a young man like you should have. Be more definitely ambitious; make your plans for the future, and then get down to brass tacks to try and realize them. Miss P.A.D.: It seems that the most of your trouble can be traced to the changeable nature that you have. You fit too readily from thing to another, and don't succeed in any of them because you don't devote sufficient energy and concentration. Send 10c coin for each specimen, and enclose with 3c stamped addressed envelope, to: Lawrence Hibbert, c/o Winnipeg News, paper Union, 175 McDermot Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for evening and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable in the designs illustrated. Send for your copy to-day, the price is 20 cents.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. ## Low Standards Of Taste

Thinks Society Is Making Rapid Progress Downward

Dr. G. G. Sedgewick, head of the department of English at the University of British Columbia, thinks modern society is anything but dynamic and is making rapid progress downhill.

"Good taste, high standards of sensitivity, the capacity to distinguish between the shoddy and the sound, do not get sufficient attention," he told an audience of school teachers and general public.

"Popular education has not yet sunk in below the surface, and there is a thinness of culture with low standards of taste."

## A Family Compact

The majority of farms in western Canada approach very closely to a family business. For instance, during the year 1930, in five main areas in Alberta and Saskatchewan, 82.7 per cent. of all the farm labor used on 573 farms was supplied by the farmer and his family.

Dried apple rings constitute practically the only type of dried fruit shipped from Canada to the British market.

Native Indians still constitute the vast majority of the population of Peru, according to the latest census.

It has been estimated that a billion pencils are used in the United States every year.

## Japs Were Real Fals

Gave Enough To Pay For Funeral Of Vagrant

A toothbrush, a small box of tooth-powder, a piece of soap, a towel, needle, thread and scissors and 43 sen were the sole possessions of a 35-year-old Japanese vagrant, Matsuiro Iwasaki, who died of heart failure at Osaka.

Five yen, currently \$1.50, the cost of his funeral, including a few flowers, was raised among fellow vagrants of which there were more than 300. Each contributed one sen (100th of a yen). They formed a procession and followed the small peddler's cart on which was placed the rough coffin and pitiful belongings of Matsuiro.

The short ceremony, said to be the first in Japan for such a lowly person, was performed at the crematorium in Abeno, Osaka, by a Buddhist priest. Chief mourner was the manager of the city boarding house in the Inamae shun district, where Matsuiro stayed over nights. During the day time he picked up rags to maintain existence.

Constant good nature of the poor peddler had endeared him to his brother vagrants.

## FASHION FANCIES

7.44

## TWO-WAY NECKLINE

Ellen Worth pattern of smart sports model suitable for plain or print silks, sheers, wools, besides novelty cotton and linen. Style No. 744 is designed for sizes 14 to 20 years, 36 to 40-inches bust. Size 16 requires 3 1/2 yards of 39-inch material for bodice and 18-inch contrasting for belt trim.

## The Last Post

Will Be Sounded Daily From The Menin Gate At Ypres

The "Last Post" will be sounded daily at the Menin Gate of Ypres for ever. At this spot, familiar to many Canadians who fought in the Great War, and scene of bitter fighting, Belgian firemen for four years sounded the lament daily on bugles presented by the British Legion.

The Legion now has raised an endowment fund to ensure that the ceremony will be performed in perpetuity.

At a recent meeting in Nova Scotia of the Potato Marketing Board members of the retail trade mentioned ed grading, which was introduced in 1923 by the Dominion Department of Agriculture, as an example of what could be accomplished in standardizing a product. This is of particular interest, because some of the members who paid the highest tribute to ed grading had previously been prosecuted for violation of the regulations.

All the inhabitants on the oasis of Matmata, in the Sahara desert, live underground. The curious village of tunnels was constructed as a defence against roving bandits.

Experiments have shown that sweet corn loses its sweetness six times as fast kept at 86 degrees Fahrenheit as at 92.

Printing patterns on thin woven materials and heavy cloth is possible by a process just perfected in England.

## DEMOLISHING A FAMOUS OLD BRIDGE

The work of tearing down the famous old Waterloo Bridge, London, which was commenced nearly a year ago, is making slow progress. Here we see stonemasons at work beneath the surface of the bridge, cutting their way through the stonework of the pillars.

## Synthetic Rubber

Can Make Rubber From Coal And Oil In Limited Quantities, Is Ready When Need Arises

Its formula, already developed in the Du Pont laboratories, was reported to the American Chemical Society by Dr. E. R. Bridgwater of the company's rubber chemicals division.

This coal and oil rubber will be the same artificial rubber now made from the gas acetylene—a rubber that in some ways surpasses real rubber, and that has already made automobile tires equal in all respects to actual rubber.

Dr. Bridgwater's disclosure came during a tribute to Father Julius A. Nieland of Notre Dame, whose acetylene discoveries led to the present artificial rubber.

"With our practically unlimited domestic reserves of coal and limestone," said Dr. Bridgwater, "the production of acetylene and of salt for hydrogen chloride, obviously it will be possible, if a national emergency should arise, to equip ourselves quickly to produce a sufficient quantity of chlorine rubber to supply the nation's needs."

## Advocated Flat Earth Theory

William Edgell Always Believed His Idea Was Right

There are still people who believe that the earth is flat.

William Edgell, who died recently, was one of them. He spent his life advocating the flat earth theory. He even wrote a book, "Does the Earth Rotate," in which he tried to prove that the earth is flat, and that it is the centre of the system. His arguments, based on the Ptolemaic, were fantastically ingenious.

Edgell did not explain why outward-bound ships gradually disappear below the horizon, or why it is possible to circumnavigate the globe, or why, at a lunar eclipse, the shadow of the earth, as it encroaches on the moon, is seen to be round.

## Invisible Fortifications

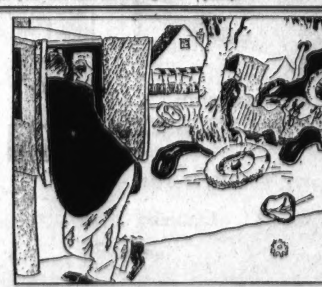

Steel Chain Stretches Across Western Soviet Frontier

Russia's invisible fortifications, comprising part of the "steel chain" stretching along the western Soviet frontier, were described by a writer in the Moscow Daily News who visited the fortified zone.

The fortresses, he said, built in the sides of hills and in other innocent appearing spots in a peaceful countryside, are most modern in design, with complicated ventilating systems and bomb-proof cellars.

He described a sham battle in which the hillside suddenly blazed with cannon fire directed against advancing tanks and infantry.

There are two sides to every question—your side and the wrong side.

Motorist (phoning garage): "Come as quickly as you can and bring every part of a car you think of."—Smith's Weekly, Sydney, Australia.

## New Empire Feature

Monthly Broadcast From St. Paul's Cathedral Starts In June

The Empire will soon be able to listen to services in St. Paul's Cathedral.

Arrangements are being concluded between the dean and chapter of St. Paul's and the British Broadcasting Corporation for a service to be broadcast to the Empire each month.

The services will be held on the second Sunday of each month, beginning on June 9, and will occupy 40 minutes—from 2:15 p.m. to 2:55 p.m. (British summer time).

The services will be incorporated in the program of the B.B.C.'s Empire broadcast service, radiated from Daventry, and arrangements will be made for them to be available for reception by the maximum number of listeners overseas, either during the actual broadcast from the cathedral or by means of electrical recordings radiated in subsequent transmissions.

The full choir of St. Paul's will take part.

## Flowers By The Ton

Shipments Arrive Daily In London For Covent Garden

Imagine measuring flowers by the ton! Dozens or even hundreds don't count at all at Paddington Station in London where about 60 tons of flowers arrive nearly every morning en route for Covent Garden. Already this year 1,500 tons of cut flowers have been shipped into London, and during recent weeks it has been necessary to run 20 "flower specials" from Penzance to Paddington. The flowers are grown in Cornwall and the Sicily Isles.—Toronto Telegram.

## Recipes For This Week

(By Betty Barclay)

## HAMERIN OF SALMON

3 tablespoons quick-cooking tapioca  
1/2 teaspoon salt  
Dash of cayenne  
2 cups flaked salmon  
1/2 tablespoon minced parsley  
3 cup milk  
1/2 cup fine bread crumbs, buttered  
Combine quick-cooking tapioca, salt, cayenne, salmon, parsley, and milk. Turn into greased ramekins or custard cups. Cover with crumbs. Bake in moderate oven (350 degrees F.) 35 minutes, or until done. Garnish with parsley. Serve with or without celery sauce. Serves 6.

## YANKEE RICE PUDDING

1/4 to 1/2 cup rice  
1/2 cup milk  
1/2 to 1/4 cup sugar  
4 cups milk  
Grated rind of 1/4 lemon  
Mix ingredients and pour into a buttered casserole, set in a pan of hot water and bake 3 hours in a very slow oven. Stir the pudding every 15 minutes for first hour to prevent rice from settling. Serve either hot or cold with thin cream.

## Sagebrush Area Made Fertile

Osoyoos District In British Columbia Shows Amazing Growth

A vast area of Osoyoos district, in British Columbia, that was once miles of stubborn sagebrush and tangled grassweed, is rapidly being transformed into marvellous, fertile farming country.

During the last six months population has nearly doubled; new homes have sprung up everywhere, dotting the valley in various stages of completion; virgin soil is being cultivated and tomatoes and cantaloupes planted in green houses; hundreds of new fruit trees planted; nearly all available farm land has been reared.

In that short time 50 new families, men, women and children, have moved into the district, all confident that a profitable living can be wrested from mother earth.

Fences and irrigation ditches have appeared as though by magic and the new fertile land is being tilled and sown.

## Boy Scout Resourcefulness

Old toys, old clothes, old shoes, old furniture are frequently called for by Boy Scouts in their welfare work. It remained for Oxford Scouts to spring a new one. They were asked to be Roman soldiers in a pageant. Having the Scout reputation for resourcefulness, they were requested to make their own Roman helmets. The answer: 100 old bowler hats, minus rims, plus 1 gallon aluminium.

## A Cyclops Bee

A one-eyed bee, and a dead one at that, had its photograph taken by J. F. Reinhardt, research fellow in the entomology section of Iowa State College. Only three or four such "cyclops" bees have been recorded. Reinhardt said. A normal bee has two compound and three simple eyes, the scientist explained.

Seventy of every 100 men in Birmingham, England, who were idle in 1931 have returned to work.

## GARDENING

Gordon L. Smith

## Screening

Growing screens offer a solution to things which are better hidden. The straight lines of resistance are broken by a few bushes and vines. These growing screens are divided into two classes, annual climbers and tall plants which of course must be renewed each year, and perennial creepers and shrubs or trees. The latter are permanent but take more time to produce and may be supplemented the first year or two with annuals. The annuals, instead, have the advantage of speed, in a month or two they are performing their duty of shutting off an objectionable view, or screening the noon day sun from the veranda, and the very fact that they are there for one year only, allows an opportunity for change and changing things about is one of the fascinations of gardening. Of the annual plants, African Marigolds, Cosmos, Ornamental Sunflowers, Larkspurs, Castor Beans, and other bushy, fairly tall plants will make satisfactory screens of early July. Among the annual climbers are Morning Glories, Nasturtiums, Sweet Peas, Hops, Beans, and other climbing vines, Cobaea, Gourds, Cardinal Climber and Canary Bird Flower.

## Grow Vegetables Quickly

If vegetables are to be tender, they must be grown quickly. Especially with such things as radish, carrots and beets, slow growth is disastrous as the roots become woody and filled with objectionable fibres. But this rule also applies to salad materials like lettuce. Therefore, growth should be pushed along with frequent cultivation, which in addition to checking weeds, also conserves moisture. Cultivation alone will often keep the vegetables going through a dry spell, but of course a few pails of water, or an hour or two with the hose at such a time, will prove beneficial. Where the supply of water is not large, plant those things most in need of early moisture, such as radish, lettuce and celery, closest to the pump. Fertilizer is another way of hurrying growth, and therefore assuring vegetables of the highest quality.

## Planting

Flowers divide themselves into main planting groups. The first to be sown are those very hardy kinds which naturally reproduce themselves in Canada. Annuals, biennials, perennials, and shrubs, which are sown first in the spring. The second group are the annuals, biennials, perennials, and shrubs, which are sown first in the spring. The third group are the annuals, biennials, perennials, and shrubs, which are sown first in the spring. The fourth group are the annuals, biennials, perennials, and shrubs, which are sown first in the spring.

## Travel Savings Cards

English Railway Has Plan To Save For Holiday Trip

Purchase your holiday rail tickets by six-penny stamps on travel savings cards.

This simple and convenient savings system is to be introduced shortly by the Great Western Railway.

A large number of stations have been supplied with a stock of travel savings cards, and on each card space has been provided for 20 six-penny postage stamps, which may be purchased from any post office. The booking clerk will record the name of the person at the time the card is issued, and the station's name will be stamped on the back.

When fully stamped each card represents a face value of 10 shillings and will be accepted at the issuing booking office either in full or part payment of whatever ticket the passenger requires.

Any shortage in the fare will be adjusted by cash payment at the same time.

## Exhibit Will Be Interesting

Wax Models Of King And Queen To Be Shown

Life-size tableaux of the King and Queen in the state robes, modelled in wax, will be on view in the United States and other countries during the Silver Jubilee celebrations.

They are the work of Louis Tusseau, a great-grandson of the famous French woman who gave her name to the world's most famous wax-work show, in London.

The models are of a size to be shown in large stores and theatre vestibules, and already India has taken half a dozen, and so have Australia, Canada and South Africa. Since also wants one although it costs \$500 in freight charges. About 70 sets are ready for the jubilee.

## Idea Did Not Work

Apparently someone in Montreal has a firm belief in the right of women to vote. Among proposed additions to the voters list of Malouine were found 51 names of women with the Christian names slightly altered to indicate they were men. The names were Yvonne, Irene, Germaine, Lucienne or Florence and were submitted for addition as Yvon, Irene, Germain, Lucien or Florian. All 51 were rejected.

## To Study Bird Migration Across the

desert, and other matters, a scientific expedition has left Cairo, Egypt, for the Gifl Kebir plateau in the Libyan Desert.

A new industry, making artificial leather from wool, has sprung up in England.

### DEATH OF GRACE VALERIA WINSLOW

(Contributed)  
(Reprinted by Request)  
Sadness and gloom were cast over  
the entire community when it was  
learned that Grace Winslow, young-  
est daughter of Mr. and Mrs. C. E.  
Winslow had passed away. Grace  
was ill for months, but in spite of  
all that medical and loving hands  
could do, she passed peacefully away  
to her final reward on Sunday,  
March 31 at 11 a.m.

Grace was born August 35, 1920,  
and grew up to love and be loved by  
those who will ever so tenderly cher-  
ish her sweet and pure memory. No  
one can fill the vacant chair; no one  
will take her place in our hearts. It  
will be a sacred thought in years to  
come, to parents and friends, that  
she shed radiance in the home as  
long as she did. A tender clinging  
vine, interwoven in the sweet mem-  
ories; a gentle spirit of light that  
fitted in and out like a gleam of  
sunshine. Why she should be taken  
just in the bud of life is a mystery,  
but some day we will understand.  
Besides her parents she leaves to  
mourn her loss: Neva, Oliver, Eva,  
Ellen and Royal; her Grandmother,  
Mrs. Johnston, and a number of  
Aunts, Uncles and Cousins.

The funeral service was held at  
the home on Tuesday, Rev. T. R.  
Davies, of Ponoka officiating. In-  
terment in Lacombe Cemetery.  
The pall bearers were Allan and  
Harold Rowland, Denmar Sheppard

and Herbert Flegel.  
Much sympathy is extended to  
Mr. and Mrs. Winslow and family.  
Never was the sky so dark blue,  
But that the sun came breaking  
through;  
There never was a night so dark  
But wakened to the singing lark;  
No heart so sad that sometime  
after  
There came no sound of liting  
laughter;  
And death's not the end—neath  
the cold, black sod—  
'Tis the Inn by the Road on our  
way to God

### LADIES GOLF
